

1492-IFM20F-FS24A-4

Fusible Two 4-Point Isolated Groups with 4 Terminals/Input and 24V AC/DC Blown Fuse LED Indicators

Application Notes

1. **Compatibility** — To ensure proper operation with the I/O module, do **not** exceed the voltage and current ratings of the IFM. When this IFM is used with a hard contact (relay) output circuit that switches an inductive load, surge suppression must be used (e.g., a 1N4004 diode reverse-wired across a DC load).
2. **Wiring** — Refer to the Label Section on page 174. For Field-Side Wiring Diagrams, refer to the Wiring System web site information on page 200.
3. **Fusing** — Fuse holders are included with the IFM. Fuses (5 x 20 mm) are not included.
4. **Isolation** — The fuse clips and blown fuse indicators are isolated into two groups of terminals. This allows each group of output devices to reference a different power source.
5. **Dimensions** — Refer to page 173.
